DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The cumulative particle volume distribution table set forth in independent claims 1 and 2 is indefinite. The claims do not provide sufficient instruction as to how to properly read the table. In the applicant's remarks filed on 7/30/07 the applicant states that:

"Importantly, because the data represents a <u>cumulative</u> particle volume distribution, the range (upper and lower limit) recited for a particular size represents the population of all of the particles in the flux having a particle size <u>up to an including</u> the recited particle size. In order to satisfy the claimed cumulative particle distributions, all of the tabulated distribution conditions must be satisfied."

According to this citation the x(micron) of 0.45 would require "up to 0.45 micron". The examiner disagrees because there is no indication in the table or the claims that X=0.45 micron reads on "up to 45 micron". It is the examiner's interpretation that the "0.45" reads solely on the specific particle size of 0.45 micron. Furthermore, it is the examiner's position that the cumulative language does not require the "up to" limitation. Importantly, it should be noted that some terms have been determined to have the

Art Unit: 1793

following meanings in the factual situations of the reported cases: the term "up to" includes zero as a lower limit, *In re Mochel*, 470 F.2d 638, 176 USPQ 194 (CCPA 1974). Consequently, when the examiner interprets the particle size column in the manner suggested by the applicant the entire particle size column reads on zero.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiley Stoner whose telephone number is 571-272-1183. The examiner can normally be reached Monday-Thursday (9:30 a.m. to 8:00 p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jonathan Johnson can be reached on 571-272-1177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
